UNIVERSITY COLLEGE, LONDON.

PROCEEDINGS

AT THE

ANNUAL GENERAL MEETING

OF

THE MEMBERS OF THE COLLEGE,

WEDNESDAY, 29TH FEBRUARY, 1860.

REPORT OF COUNCIL AND FINANCIAL STATEMENTS.

APPENDIX.

REGULATIONS FOR THE FILLITER EXHIBITION
IN PATHOLOGICAL ANATOMY.

LONDON:

PRINTED BY TAYLOR AND FRANCIS, RED LION COURT, FLEET STREET.

1860.

OFFICERS OF THE COLLEGE.

President.—LORD BROUGHAM.
Vice-President.—THE EARL FORTESCUE, K.G.
Treasurer.—GEORGE GROTE, Esq.

COUNCIL.

The President.
Lord Belper.
James Booth, Esq.
*Dr. Boott.
The Hon. Richard Denman.
*Edward Enfield, Esq.
*Robert Nicholas Fowler, Esq.
*Thomas Field Gibson, Esq.
**Sir F. Henry Goldsmid, Bart., Q.C., M.P.
Frederick D. Goldsmid, Esq.
Arthur Woodriff Jaffray, Esq.
*Richard Martineau, Esq.

The Vice-President.
John Mellor, Esq., Q.C., M.P.
Timothy S. Osler, Esq.
*Alexander P. Prevost, Esq.
†Henry Crabb Robinson, Esq.
The Rt. Hon. Sir John Romilly, Master of the Rolls.
Edward Romilly, Esq.
The Rt. Hon. Sir Edward Ryan.
John Taylor, Esq., F.R.S.
Alfred Wills, Esq., LL.B.
Frederic John Wood, Esq., LL.D.

The Treasurer.

† *Ex-Officio, as President of the Senate, Member and Chairman of the Committee of Management.*
** *Chairman,* * *Member, of the Committee of Management.*

AUDITORS.

John Hampden Fordham, Esq.
William Fowler, Esq.
Henry William Busk, Esq.
David Mocatta, Esq.

SENATE.

President.—HENRY CRABB ROBINSON, Esq.

Vice-Presidents.—SIR F. H. GOLDSMID, BART., M.P.; RICHARD MARTINEAU, ESQ.

Faculty of Arts and Laws.

DEAN.—Francis W. Newman, Esq.	Professor of Latin.
VICE-DEAN.—Henry Malden, A.M.	Greek.
Count Charles Arrivabene, LL.D.	Italian Language and Literature.
Edward S. Creasy, A.M.	Ancient and Modern History.
Augustus De Morgan	Mathematics.
T. L. Donaldson, Ph.D., M.I.B.A.	Architecture.
Dádábhái Naoroji	Gujaráti.
Theodor Goldstücker, Ph.D.	Sanskrit.
Robert Edmond Grant, M.D.	Zoology.
John Philip Green, LL.B.	Jurisprudence.
Adolph Heimann, Ph.D.	German.
Eaton Hodgkinson, Esq.	Mechanical Principles of Engineering.
The Rev. John Hoppus, Ph.D.	Philosophy of the Mind, and Logic.
Thomas Hewitt Key, A.M.	Comparative Grammar.
John Lindley, Ph.D.	Botany.
Rev. D. W. Marks	Hebrew.
David Masson, A.M.	English Language and Literature.
P. F. Merlet, Esq.	French.
John Morris, F.G.S.	Geology and Mineralogy.
William Pole, Memb. Inst. C.E.	Civil Engineering.
Richard Potter, A.M.	Natural Philosophy and Astronomy.
Charles Rieu, Ph.D.	Arabic.
John A. Russell, LL.B.	English Law.
Baron von Streng	Tamul.
Syed Abdoollah	Hindustani.
Jacob Waley, A.M.	Political Economy.
Alex. W. Williamson	Chemistry and Practical Chemistry.
Office vacant	Chinese.

Faculty of Medicine.

DEAN.—Alexander W. Williamson,	Professor of Chemistry and Practical Chemistry.
VICE-DEAN.—John Eric Erichsen, Esq.	Surgery, and Clinical Surgery.
George Viner Ellis, Esq.	Anatomy.
Alfred Baring Garrod, M.D.	Materia Medica, and Clinical Medicine.
Robert Edmond Grant, M.D.	Comparative Anatomy.
George Harley, M.D.	Medical Jurisprudence.
William Jenner, M.D.	Pathological Anatomy and Clinical Med.
T. Wharton Jones, Esq.	Ophthalmic Medicine and Surgery.
John Lindley, Ph.D.	Botany.
Edward W. Murphy, M.D.	Obstetric Medicine.
Edmund A. Parkes, M.D.	Clinical Medicine.
Richard Quain, Esq.	Clinical Surgery.
William Sharpey, M.D.	Anatomy and Physiology.
W. H. Walshe, M.D.	Medicine and Clinical Medicine.

Junior School.

HEAD MASTER.—T. Hewitt Key, A.M.

Secretary to the Council.—CHARLES C. ATKINSON.

March 1860.

UNIVERSITY COLLEGE, LONDON.

ANNUAL GENERAL MEETING

OF

THE MEMBERS OF THE COLLEGE,

WEDNESDAY, FEBRUARY 29TH, 1860.

RICHARD MARTINEAU, ESQ.,

IN THE CHAIR.

The Chairman appointed SAMUEL GALE, Esq., and STEPHEN FREEMAN, Esq., Scrutineers, to ascertain and report the result of the Ballot.

The Requisition, and the following Lists, were read by the Secretary:—

1. OF OFFICES TO BE VACATED.

President, Vice-President, Treasurer, six Councillors, Auditor.

2. OF MEMBERS HOLDING THESE OFFICES.

President. LORD BROUGHAM.

Vice-President. THE EARL FORTESCUE, K.G.

Treasurer. JOHN TAYLOR, Esq., F.R.S.

Councillors.

THOMAS WILLIAM EVANS, Esq., M.P.
CHARLES JAMES FOSTER, LL.D.
JOHN MELLOR, Esq., M.P.
EDWARD ROMILLY, Esq.
FREDERICK W. MACKENZIE, M.D.
THE RIGHT HON. SIR EDWARD RYAN.

Auditor. THOMAS M. COOMBS, Esq.

3. MEMBERS PROPOSED.	BY WHOM PROPOSED.
For President,	
LORD BROUGHAM	THE COUNCIL.
For Vice-President,	
THE EARL FORTESCUE, K.G.	THE COUNCIL.
For Treasurer,	
GEORGE GROTE, Esq., F.R.S.	THE COUNCIL.
For Councillors,	
THE HON. RICHARD DENMAN	THE COUNCIL.
JOHN MELLOR, Esq., M.P. (for re-election)	THE COUNCIL.
TIMOTHY SMITH OSLER, LL.B., Fellow of the College	THE COUNCIL.
EDWARD ROMILLY, Esq. (for re-election)	THE COUNCIL.
THE RIGHT HON. SIR EDWARD RYAN (for re-election)	THE COUNCIL.
JOHN TAYLOR, Esq., F.R.S.	THE COUNCIL.
ALFRED WILLS, LL.B., Fellow of the College	THE COUNCIL.
For Auditor,	
DAVID MOCATTA, Esq.	THE COUNCIL.

The Report of the Council was read by the Secretary.

On the motion of David Mocatta, Esq., seconded by Ashton Yates, Esq.,

RESOLVED UNANIMOUSLY,—That the Report be received; that it be printed and circulated among the Members of the College.

On the Motion of James Yates, Esq., after noticing the retirement of John Taylor, Esq., from the office of Treasurer, seconded by David Mocatta, Esq.,

RESOLVED UNANIMOUSLY,—That this Meeting recognizes with unfeigned respect and gratitude the long-continued and highly valuable services rendered to the College, as Treasurer, and Chairman of the Committee of Management, by John Taylor, Esq., Fellow of the Royal, Linnean, and Geological Societies, and Treasurer to the British Association for the Advancement of Science. The Members of the College here present beg to express their wish for the prolongation of Mr. Taylor's life in health, honour, and happiness.

The Statement of Receipt and Expenditure for the year 1858–1859, and other Financial Papers were read.

Mr. Busk moved that the Auditor's account be published without any addition: Mr. Fordham seconded the Motion. Mr. Gibson moved as an Amendment, that the addition be printed as follows:—The Council think

it right to add the following explanation of the sum which appears as the deficiency on the year's account :—

To amount belonging to next Session, 1859–60, viz.						
Fees of Students			£92	5	0	
Fees of Hospital Students			11	5	0	
Fees of School Pupils			837	0	0	
Library Deposits			147	11	6	
			£1088	1	6	
Less cash in hand 30 Sept. 1859	£26	7 1				
Ditto at Messrs. Smith, Payne & Co.	853	14 6				
			880	1	7	
						£207 19 11

The Amendment was put, and passed in the affirmative, *nem. con.*

The Return of the Scrutineers was presented to the Chairman, who declared the RESULT OF THE BALLOT to be as follows :—

For President.....LORD BROUGHAM.
For Vice-President .....THE EARL FORTESCUE.
For Treasurer.....GEORGE GROTE, Esq., F.R.S., F.L.S.

For Councillors.

THE HON. RICHARD DENMAN.
JOHN MELLOR, Esq., M.P.
TIMOTHY SMITH OSLER, LL.B.
EDWARD ROMILLY, Esq.
THE RIGHT HON. SIR EDWARD RYAN.
JOHN TAYLOR, Esq., F.R.S.
ALFRED WILLS, LL.B.

For Auditor, DAVID MOCATTA, Esq.

RICHARD MARTINEAU, *Chairman.*

On the motion of David Mocatta, Esq., seconded by John Hampden Fordham, Esq.,

RESOLVED UNANIMOUSLY,—That the thanks of the College be returned to Mr. Martineau for his kindness in presiding at this Meeting, and for his conduct in the Chair.

CHARLES C. ATKINSON, *Secretary.*

REPORT.

SESSION 1858–59.

STUDENTS.

The number of Pupils in the College during the Session 1858–59 was 821: viz. 439 Students, and 382 boys in the Junior School. The Students of the Faculty of Medicine were 198, of whom 63 were new Students; the Students of the Faculty of Arts and Laws were 241, including 35 attending the Patriot Fund Classes for Schoolmasters; the new Students in the general Classes were 116. The Students of Analytical Chemistry in the Birkbeck Laboratory were 18. The highest number of boys in the Junior School in any one Term was 322. The Receipt from Students and Pupils was £13,990 5*s.* 6*d.* The sum of £4992 12*s.* 6*d.* was received from the Medical Faculty: viz. for attendance on Classes, £3413 5*s.* 6*d.*; on Hospital Practice, £1579 7*s.* The Receipt on account of the Faculty of Arts and Laws, £3489 13*s.*; that of the Junior School, £5508. The share of Professors and Masters, exclusive of the annual augmentations to the Professors of Natural Philosophy and Comparative Anatomy, and of the interest of the Patriot Fund to the Professors of the Schoolmasters' Classes, £9533 5*s.* 8*d.* The College portion amounted to £2877 12*s.* 10*d.* The sum of £1579 7*s.*, received for Clinical Instruction at the Hospital, was paid to the Hospital Committee towards the support of the Charity.

As regards both Faculties of the College, the comparison of the year 1859 with that which preceded it is satisfactory, and shows an increase in number of Students and amount of Fees. The Junior School was not quite so full as in the former year.

The entries for the current Session up to this period are—Medical Students, 182, of whom 49 are new Students; new entries to the Hospital Practice, 46; Students of the Faculty of Arts and Laws, 204, new Students, 107, making, together with 26 attending the Schoolmasters' Classes, 230. The number of Boys in the Junior School in this Term is 323. At the corresponding period of last year the number was 316.

The Classes of the faculty of Arts in which there is an increase are those of Latin, Greek, Extra Class of Greek, Comparative Grammar, German, Philosophy of Mind and Logic, and Political Economy. The increase in the Class of Philosophy of Mind and Logic in comparison with former years deserves notice. Professor Hoppus attributes it in some degree to the altered position in which the subjects stand in relation to the Examinations for the B.A. Degree of the University of London, which, while they were formerly partially ignored, are now made essential to the Degree. He reports that the increase in numbers has had a satisfactory effect on the general diligence manifested in the class and on the zeal and talent displayed by a considerable proportion of it.

COLLEGE PRIZES.

Andrews Scholarships for 1859, for proficiency in Latin, Greek, Mathematics, and Natural Philosophy, were awarded to Mr. Julian Goldsmid

of London, and Mr. George Ralli, of London, to each a £60 Scholarship. Mr. Ralli has since informed the Council that he is prevented continuing his studies in the College. The Scholarship will consequently not be tenable by him.

The Atkinson Morley Surgical Scholarship of £45 per annum, tenable for three years, was awarded to Mr. Felix Henry Kempster, of London.

The Joseph Hume Scholarship in Political Economy, of £20 a year for three years, was obtained by Mr. Henry Selfe Page Winterbotham. The Examiners reported that the answers of Mr. Winterbotham were of a very high order of merit; that the positive proficiency of Mr. Jacob Stiebel and Mr. Job Bradford was deserving of commendation, and such as they should have considered worthy of the Scholarship.

The Clinical Gold Medal of Dr. Fellowes, for observations on Medical cases in the Hospital for the Winter Term, was conferred on Mr. Philip Sydney Jones, of New South Wales. Dr. Fellowes's Gold Medals for the Summer Term were awarded to Mr. Thomas Charles Kirby, of Bodicot, Oxfordshire, and to Mr. Augustus Mawley, of London.

The Longridge Prize of £40, of the Session 1859, for general proficiency in Medicine and Surgery, was awarded to Mr. Thomas Charles Kirby. The Prize offered by the Council for the best English Essay on an Historical, Biographical, or Speculative Subject, was awarded to Mr. Joseph Dare, of Leicester, B.A. The subject proposed by the Senate was, "An Account of Bacon's method of Inductive Philosophy, from his own writings; and an estimate of its value, and of its influence upon Scientific Discovery." Professors De Morgan and Masson were the Examiners. There were six Candidates. A similar Prize has been offered for the Current Session. The subject, "Toleration in matters of opinion."

The Jews' Commemoration Scholarship of £15 a year, tenable for two years, was awarded to Mr. Nathaniel Nathan, of London: of the Students of the Faculty of Arts of not more than one year's standing in the College, he was found by the Faculty to be most distinguished for general proficiency and good conduct.

Change in the Andrews Scholarships.

In the Report on the Examinations for the Andrews Scholarships in 1858, the Examiners expressed their opinion that it would be much more to the advantage of the Students and to the promotion of the subjects of study, if separate Mathematical and Classical Scholarships were founded. The Council referred the question to their Committee—Lord Belper, Mr. Booth, Mr. Grote, and Sir Edward Ryan; and by their advice, given after mature deliberation and hearing the reasons of the four Classical and Mathematical Professors, decided on offering in every year one of the Andrews Scholarships to Classical Proficiency alone, and the other to Mathematical Proficiency alone, the sum allotted to each being equal. Accordingly a Scholarship of £85 for the best Proficient in Latin and Greek, and one of £85 for the best Proficient in Mathematics and Natural Philosophy, without limitation as to age, are offered for the present Session, and will be offered annually until further notice, to be competed for in October. For the last Session the subjects of Examination were the same as they had been previously.

The question, in what mode the unawarded and unenjoyed Scholarships shall be disposed of, has been referred by the Council to their Committee for consideration and report.

JUNIOR SCHOOL.

The Junior School, it may have been observed, maintains its total number of pupils, with only a small diminution compared to the largely increased total realized during the two years immediately preceding. The Reports of the Head Master and of Professor Malden describe the working of the various classes as on the whole satisfactory. The behaviour of the pupils has been orderly, and has presented no ground for complaint; while the reputation of the School, as to diligence and progress, has been sustained by the creditable position which its pupils continue to take in the subsequent Examinations of the College.

The only marked novelty during the last Session has been the formation and commencement of the Class on Practical Chemistry, alluded to in the Report of last year. This class was very successfully taught by Mr. George Carey Foster, and promises well for the future under the conduct of Dr. Russell.

There is one other point respecting the Junior School to which the Council are desirous of calling attention. The Head Master remarks with regret that his anxiety to do complete justice to the pupils is often partially frustrated by the late age at which they are first sent to the School. Few come at so early an age as would be desirable; and many are not entered until they have completed their thirteenth or even fourteenth year. At that age much time is often lost before they can be brought fully into the regular system of instruction. Sometimes intellectual habits previously acquired have to be unlearnt. The Council are deeply sensible how much larger and surer is the benefit imparted to a pupil when he is first entered at eight or nine years of age rather than at thirteen and fourteen. They venture to submit this topic to the serious consideration of parents. They are led to believe that the School is not always clearly distinguished from the College,—the age proper for admission to the one being confounded with the age suitable for the other. However this may be, the importance is great and undeniable, both to the pupils individually and to the Junior School collectively, of encouraging admissions at an age earlier than that which is now usual.

The former pupils of the School who distinguished themselves in the College Examinations, and obtained Prizes and Certificates of Honour, were:—Mr. Horace Gundry, the third Certificate in the Second Year's Course of Architecture as a Fine Art; Mr. Alfred Roscoe, the first Prize in the Senior Class of Latin, the second Prize in the Senior Class of Greek, and the first Prize in the Junior Class of English; Mr. Henry Enfield Dowson, the fourth Certificate in the Senior Class of Latin, the ninth Certificate in the Senior Class of Greek, the third Prize in the Junior Mathematical Class of Natural Philosophy; Mr. Charles Trice Martin, the fifth Certificate in the Senior Class of Latin; Mr. William Lant Carpenter, the sixth Certificate in the Senior Class of Latin, and the fourth Certificate in the Class of Analytical Chemistry; Mr. Thomas E. Jevons, the sixth Certificate in the Senior Class of Latin, equal with Mr. Carpenter, and the third Certificate in the Lower Senior Class of Mathematics; Mr. Alfred C. Tupp, the seventh Certificate in the Senior Class of Latin, the fourth Certificate in the Senior Class of Greek, and the Prize in the Class of Italian; Mr. Alexander Bruce, the third Certificate in the Junior Class of Latin, the fifth Certificate in the Junior Class of Greek, and the sixth Certificate in the Higher Junior Class of Mathematics; Mr. Nathaniel Nathan, the first Prize in the Junior Class of Latin, the fourth Certificate in the Junior Class of Greek, the second Prize in the Senior Class of French, the second Certificate in the Senior Class of German, the third Certificate in the Higher Junior Class of

Mathematics, and the Jews' Commemoration Scholarship; Mr. Darnton Lupton, the fourth Certificate in the Junior Class of Latin; Mr. George F. Browne, the sixth Certificate in the Junior Class of Latin; Mr. Campbell Orme, the Prize in the Junior Class of Greek, and the fourth Certificate in the Junior Class of English; Mr. Benjamin Kisch, the eighth Certificate in the Senior Class of Greek, the fourth Certificate in the Higher Senior Class of Mathematics, and the third Certificate in the Senior Mathematical Class of Natural Philosophy and Astronomy; Mr. Henry Lister, the second Certificate in the Junior Class of Greek, and the fifth Certificate in the Class of Geology; Mr. Talfourd Ely, the first Certificate in the Schoolmasters' Class of Greek; Mr. Philip Magnus, the fifth Certificate in the Senior Class of English, the second Certificate in the Lower Senior Class of Mathematics, and the second Prize in the Class of Geology; Mr. Edmund S. Schwabe, the fourth Certificate in the Lower Senior Class of Mathematics; Mr. Lionel E. Varicas, the fifth Certificate in the Lower Senior Class of Mathematics, and the Second Prize in the Junior Mathematical Class of Natural Philosophy; Mr. George De Morgan, the second Certificate in the Higher Junior Class of Mathematics, and the fifth Certificate in the Junior Mathematical Class of Natural Philosophy and Astronomy; Mr. Benjamin Powell Seare, the seventh Certificate in the Higher Junior Class of Mathematics; Mr. Thomas Hennell, the second Certificate in the First Year's Course of Civil Engineering, and the Prize in the Second Year's Course; Mr. Griffith Davies, the fifth Certificate in the Class of Geology; Mr. Richard T. Key, the second Certificate in the Junior Class of Botany; Mr. Jacob Stiebel, the second Certificate in the Class of Political Economy, equal with Mr. Hermann Nathan Adler; Mr. John B. Taunton, the Prize in English Law.

DEGREES.

The Degrees of the University of London taken by the Students of the College in the year 1859 were as follows:—M.D. 2 (in the First Division), of a total of 11 from 7 Medical Schools; A.M. 4, of a total of 13 from 9 Institutions; LL.B. 4 (all in the First Division), of a total of 9 from 6 Colleges; M.B. 6 (5 in the First Division), of a total of 13 from 4 Medical Schools; A.B. 22 (8 in the First Division), of a total of 70 from 20 Institutions:—in all 38 of a total of 116 from 29 Institutions. Two hundred and fifty-two passed the Matriculation Examination: of these, 29 proceeded from private tuition; of the remaining 223 from 110 Schools, 27, including 6 from the Junior School (17 of whom, and the 6 from the Junior School, were in the First Division), were from University College.

The Honours obtained by Students of this College at the University Examinations were as follows:—At the Examination for the Degree of LL.B., Mr. Henry Selfe Page Winterbotham, of Stroud, Gloucestershire, obtained the University Law Scholarship of £50 per annum for three years for his examination in the principles of Legislation, the second place for his Examination in Conveyancing, the third place in the Examination of the Law of the Courts of Equity, and the first place, equal with another, at the Examination in Roman Law. Mr. Ebenezer Charles, of London, obtained the third place at the Examination in the Principles of Legislation, the first place at the Examination in Conveyancing, the first place at the Examination in Law of the Courts of Equity, and the first place, equal with Mr. Winterbotham, at the Examination in Roman Law. At the Examinations for the Degree of B.M., Mr. Joseph Raymond Gasquet, of London, obtained the Gold Medal for his Examination in Physiology and Comparative Anatomy, and the third place at the Examination in Medicine. Mr. Matthew Berkeley Hill, of

London, obtained the Gold Medal for his Examination in Surgery; Mr. Hill also took honours in Medicine. At the Examinations for the Degree of B.A., Mr. Julian Goldsmid, of London, obtained the first place, equal with a student of another College, at the Examination in Classics, and the second place at the Examination in Anatomy and Physiology. Mr. Henry Charlton Bastian, of Falmouth, obtained the Prize of Books for his Examination in Chemistry, the Prize in Books for his Examination in Animal Physiology, and the Prize in Books for his Examination in Vegetable Physiology and Structural Botany.

Of Undergraduates at the First Examination for the Degree of M.B., Mr. Henry Charlton Bastian obtained the Gold Medal for his Examination in Anatomy and Physiology, Mr. Samuel Jones Gee, of London, obtained the Gold Medal for his Examination in Chemistry, Mr. Gee also took Honours in Anatomy and Physiology. Mr. William John Smith, of Basingstoke, obtained the Gold Medal for his Examination in Materia Medica and Pharmaceutical Chemistry; Mr. Smith also took Honours in Anatomy and Physiology, and in Chemistry. At the First Examination for the Degree of A.B., Mr. Hermann Nathan Adler, of London, obtained the Prize in Books for his Examination in German.

At the Examination for the Medical Service of H.M. Forces in India in January last, Mr. Leonard Emanuel obtained the second place, and Mr. Robert Carter the sixth place.

DEGREES IN SCIENCE.

The Senate of the University of London have proceeded to exercise the power, given them by the new Charter of 1858, as notified in last year's Report, of conferring Degrees in Science; and with that view have promulgated the Regulations for Examination for the Degrees of Bachelor in Science and Doctor in Science. These Regulations were published at length in the College Calendar, issued at the commencement of the Session. It will be sufficient here to mention that Candidates will be required to have passed the Matriculation Examination and to pass two Special Examinations in Scientific subjects. Bachelors of Arts, however, need only pass the second of the Special Examinations. The Candidate for the Degree of Doctor of Science must be a Bachelor of Science of two years' standing.

The Council strongly recommend to their Students not to allow either these Regulations, or the change above announced in the arrangements for the Andrews Scholarships of the College, to induce them to underrate the advantage of a full education for a Degree in Arts, or to content themselves with scientific without literary education, or with literary without scientific education.

PROFESSORSHIPS, &c.

The following are the changes which have taken place in the Professorships and other offices in the College and Hospital since the General Meeting of last year.

In the Faculty of Arts, the Professorship of Civil Engineering was resigned by Mr. Harman H. Lewis, at the conclusion of his course of Lectures; and Mr. William Pole, Member of the Institute of Civil Engineers, was appointed to the Chair.

The Class of Hindustani also became vacant in the course of the Session, Mr. Dowson, the former Professor, having obtained the Professorship of Hindustani in the Military College at Sandhurst, and gone to reside near

that place. Baron von Streng was chosen to succeed him, and to hold the chair of Hindustani in conjunction with that of Tamul. At the commencement of the current Session, however, it became known that Syed Abdoollah, a native of Hindustan, was desirous of the appointment of Professor of Hindustani in the College. There were submitted on his behalf high testimonials to his accurate knowledge of his mother tongue, and to his thorough familiarity with English, acquired in the Government College at Benares, of which he had been a distinguished student. His pretensions were strengthened by the fact of his having filled the office of Head Translator at the Board of Lahore, and of his having had 18 years' experience in teaching the vernacular languages of India, and by reference to the opinion of Sir Henry Rawlinson, that the Hindustani language can only be perfectly and profitably taught by a native of Hindustan; that for Oriental languages European teachers were best for the dead, and native teachers for the living tongues; that Sanscrit, Hebrew, Syriac, and even the literary Arabic were best taught by European Professors, skilled in the science of Grammar, and having a knowledge of Comparative Philology; but that, on the other hand, a native Moonshee was much to be preferred for the acquisition of all the living dialects of India. Baron von Streng, fully concurring in that opinion, and bearing his testimony to the high qualifications of Syed Abdoollah, immediately tendered his resignation of the Chair in his favour. The thanks of the Council were returned to Baron von Streng for his generous conduct; his offer was accepted; and the Professorship was conferred on Syed Abdoollah.

In consequence of the absence of Professor Arrivabene, called to Italy by political and family affairs, the Italian Class has been instructed by the Signor Maggione.

The proceedings of the Council for procuring a Professor of Chinese have not succeeded.

In the Medical Faculty, Dr. Carpenter, in consequence of the increase of his duties as Registrar of the University of London, and of his having engaged to give his undivided attention to those duties, resigned the Professorship of Medical Jurisprudence at the end of the last Session. Dr. George Harley, who for three previous years had instructed a class of Practical Physiology and Histology in the College, was appointed Professor of Medical Jurisprudence. As the course of Lectures on that subject is given in the Summer Term, it has been arranged that Dr. Harley's class of Practical Physiology should in future be instructed during the Winter Term.

In consequence of the long and valuable services to the Hospital of Mr. John Marshall, who has filled the office of Assistant Surgeon since 1848, and of Dr. Charles J. Hare, who has been Assistant Physician from 1850 to this date, the titles of Surgeon to the Hospital, and Physician to the Hospital, have been lately conferred on them respectively.

Dr. William Price Jones having relinquished the office of Resident Medical Officer of the Hospital in order to engage in private practice, Dr. Edwyn Andrew, a former student, who had much distinguished himself during his course in the College, was appointed his successor.

DONATIONS, LEGACIES, &c.

DONATIONS OF MR. FILLITER.

On the 4th of June Mr. Gibson informed the Council that his relative, Mr. George Filliter, of Trigon Hill, Wareham (an original proprietor of five shares in the College), had sent him Two Thousand pounds as a

Donation for the Hospital, and had signified his wish that the sum should be invested in Government Securities in the name of the College, with a view of connecting with the Hospital the name of his son, Dr. William Filliter, lately deceased at an early age, formerly a Student of the Faculty of Medicine of the College; that the dividends should be paid to the Hospital Committee for the purposes of the Hospital as the Committee should from time to time determine.

On the motion of Sir Francis Goldsmid, Bart., seconded by Mr. Grote, the Council resolved unanimously, "that Mr. Filliter be requested to accept the assurances of the Council that they sincerely condole with him on the loss of his son, Dr. William Filliter, and that they deplore Dr. Filliter's early decease as that of one who by his excellent character, and by the honours which he obtained as a Student of Medicine in the College and Hospital, reflected credit on the place of his education, and gave promise of a distinguished professional career. That the best thanks of the Council be returned to Mr. Filliter for the frequent proofs which he has given of the interest taken by him in the College and Hospital, and especially for his munificent donation of two thousand pounds just announced; that, according to Mr. Filliter's desire, that sum be applied to commemorate the connection of the late Dr. Filliter with the College and Hospital by an investment in Consolidated Bank Annuities under the title of the Filliter Hospital Fund, and by the payment in perpetuity of the accruing dividends to the Hospital Committee as the income of the Filliter Fund for the benefit of the Hospital."

The Gift was accordingly invested in Consols by the purchase of £2144 15*s.* 5*d.* in that Stock.

At the Session of Council in December a further Gift from Mr. Filliter, of £1000, which by direction of the Committee of Management had been invested in Consols £1033 11*s.* 10*d.*, was announced; and the Council were informed that the object of Mr. Filliter in making the donation was to found in the College, in memory of his son, an Exhibition in Pathological Anatomy to be called The Filliter Exhibition. Regulations for the award of the Scholarship, which had received the approval of Mr. Filliter, were at the same time submitted to the Council. On the motion of Mr. Gibson, seconded by Sir Francis Goldsmid, the following Resolution was passed unanimously:—"That the best thanks of the Council be returned to Mr. Filliter for the new proof of the zealous interest taken by him in the prosperity of the College, and for his gift of one thousand pounds to found an annual Exhibition for encouraging a diligent and profound study of the higher branches of Medical Science, in imitation of the example set by his son, Dr. Filliter, in the course of his distinguished career at this College. That the donation be accepted on the conditions and for the purpose set forth in the Regulations* entered on the Minutes of the Committee of Management; that those Regulations be hereby approved by the Council; that the income of the fund be applied in payment of an Exhibition of £30 per annum, for the encouragement of Proficiency in Pathological Anatomy, to be called The Filliter Exhibition."

LEGACY OF THE BARON DE GOLDSMID.

The Council in their last Report, in recording their regret at parting with the Baron de Goldsmid as a member of their body, called to mind the useful services and other important benefits for which the College and Hospital were indebted to that zealous friend of the Institution. They have since had to record their sorrow at his death, and their gratitude for

* *v.* Appendix.

a further evidence of his interest in the College by a bequest of a sum of £3000, with a direction that the Income of £2000, part thereof, should be applied to or towards the maintenance of a Professor of Hebrew in the College, and the income of the remaining £1000 to or towards the maintenance of a Professor of Geology. The notice of this Legacy, received by the Council on the 16th of June, was accompanied by an intimation that it was the intention of the Executors, two of whom were the Residuary Legatees, to pay the Legacy free of duty. On the motion of Lord Belper, seconded by Mr. Booth, the following Resolution was passed by the Council:—

"That the Council receive with gratitude, and respect for the memory of the late Baron de Goldsmid, the new proof which the bequest of Three Thousand Pounds affords of the interest taken by him in the prosperity of the College.

"That the Council avail themselves of the occasion to express their sorrow at the loss which the College has sustained by the decease of the Baron de Goldsmid, their condolence with the Baroness de Goldsmid and all the members of her family; and the high sense entertained by the Council of the important services which the Baron rendered to the College at its foundation, and during the many years of his zealous and active cooperation as a Member of the Council and Committee of Management, and as Treasurer of the Hospital.

"That the thanks of the Council be offered to Sir Francis Goldsmid, Bart., and Mr. Frederick Goldsmid, as Executors and Residuary Legatees, for their generous intention to pay the Legacy free of duty.

"That in order the better to commemorate the endowment by the Baron de Goldsmid of the Professorships of Hebrew and Geology in the College, the name of Goldsmid be attached in perpetuity to each of those Chairs.

"That the Council having learnt, by the list of subscriptions to the Jews' Commemoration Scholarship for University College, that the College is indebted mainly to the Baroness de Goldsmid, Sir Francis Goldsmid, and Mr. Goldsmid for the endowment which has been this day announced, of one Thousand Pounds Consols for that Scholarship, take this opportunity of acknowledging most thankfully the additional benefit thus conferred on the College by the family of the late Baron."

At the succeeding Session of Council, on the 2nd of July, a letter from Sir Francis Goldsmid to the Secretary was read, acknowledging the above Resolution in the following terms:—

"I have communicated the Resolution adopted by the Council of University College on the 16th June (and of which you were so good as to send me a copy) to my mother and to Mr. Frederick Goldsmid, and I beg on their behalf, as well as on my own, to express to the Council our thanks for the tribute of respect offered by them to the memory of my father, and for their appreciation of the services which he had the happiness to render to the College and Hospital.

"We are assured that so long as his health permitted him to attend to public matters at all, no feeling with regard to them was more strongly impressed on his mind than that of attachment to the principles of religious freedom, to the College as founded on those principles, and to the Hospital as a valuable charity allied with it, and that nothing afforded to him more enduring gratification than his recollection of the generous warmth with which his aid had been recognized by all connected with those Institutions.

"For ourselves, we are greatly obliged by the kindness of the Council in acknowledging any assistance that we may have had the opportunity

of giving to the College, which our own opinions and my father's example alike incline us to support."

The Baron de Goldsmid died on the 27th of April last. The Legacy was paid in July, and the amount invested in the purchase of £3153 14*s.* 11*d.* Consols.

JEWS' COMMEMORATION SCHOLARSHIP.

The formal proposal for the endowment of the Jews' Commemoration Scholarship, of which the Council had previously received intimation, was made at their Session on the 2nd of July by a communication dated the 29th of June, signed by Mr. Henry Faudel on behalf of the Committee of Subscribers to the fund, as follows:

"Proposal for Scholarship, University College.

"That in order to perpetuate the remembrance of the passing of the Act of the Legislature on the 23rd July, 1858 (A.M. 5618), by which Jews were enabled to sit in Parliament on taking an oath consistent with their religious principles, and to testify to the electors of the City of London the grateful sense entertained by the Jews of this country of the exertions made in their behalf, and in favour of religious liberty, by the repeated election of Baron L. de Rothschild, a Jew, as one of their representatives in the House of Commons, University College, London, be presented with one thousand pounds Consols from the Jews' Commemoration Fund, for the purpose of founding two Scholarships of the value of £15 a year each, tenable for two years, and so arranged that one may be vacant in each year. That the Scholarship be given to that student, among the Students of the Faculty of Arts of not more than one year's standing in the College, who shall be most distinguished by general proficiency and good conduct. That the Scholarship shall be open to members of every religious denomination, wherever previously educated, and be given after the Examinations at the close of the Session, but without any further special examination, and that the Scholarship shall be awarded by the Council on the Report by the Faculty of Arts. That it shall be a condition of holding the Scholarship, that the Scholar shall in each of the two years attend a Class or Classes in the College in either Faculty to the amount of 120 lectures. That if a Scholar elected as above shall wish to make the stipend of the Scholarship available towards defraying the expense of his attendance at the College in a year or years not immediately following his election, the Council shall, at his request, hold the money for him till he wishes to avail himself of it. That power be reserved to the Council of the College to vary the scheme for bestowing the Scholarship from time to time if circumstances shall seem to them to render a change necessary, provided the fundamental principles are retained; and the Scholarship, whatever it be, shall be entitled 'The Jews' Commemoration Scholarship.' A Scholarship of the value of £40 per annum has been founded in the City of London School in connexion with the University College, and likewise called 'The Jews' Commemoration Scholarship.'"

The Council resolved: "That the endowment be accepted and be held on the terms set forth in the communication just read, that the contributors to the endowment be requested to accept the best thanks of the Council for the benefit conferred on the College; and that they be assured of the gratification which the Council experience from the proof which the institution of these Scholarships in favour of University College affords of the acknowledgment and high appreciation of the advantages derived by the Jews from the establishment of this College."

INDIAN ARMY CADETSHIP.

The Council have the gratification of announcing that they have this day received through their Member Mr. Edward Romilly, from Mr. Martin Tucker Smith, M.P., one of the original proprietors of the College, and formerly a Member of the Council, the liberal and acceptable offer of a direct nomination to the army of Madras, to be conferred on any young man whom the Council may select. The appointment must be made before November 1861.

PORTRAIT OF FLAXMAN.

Among the acquisitions of the year is the Portrait in Oil of Flaxman, by the late eminent artist Henry Howard, R.A. This portrait has become the property of the College by the bequest of Miss Maria Denman, lately deceased, the lady to whom the Institution is indebted for the donation of the Collection of Sculptures forming the Flaxman Gallery, a gift which cannot fail to cause her memory to be held in lasting and grateful respect in the College.

PRESENTS FOR LIBRARIES AND MUSEUMS.

The list of Donations for the Library and Museum during the year will be given as usual in the appendix. The Council have only to take more special notice of a fresh instance of the remembrance of the College by its former students in distant lands afforded by the present for the Museum of Natural History, by Dr. George Grey of Colesberg, Cape of Good Hope, of an interesting collection of Zoological, Mineralogical, and Botanical specimens from that district of South Africa, about 650 miles N.E. of Cape Town. The Zoological specimens are fragments of extinct reptiles—Dycynodons, from the blue argillaceous schist, belonging to the Permian epoch. They were brought from the Orange Free State, a little north of the Orange River near to its junction with the Caledon. The Mineralogical specimens were discovered in the Dordrecht, a farm a little south of the Orange River, fifty miles east of the town of Colesberg. The Botanical specimens are from the Division of Colesberg. The Bulbs grow in alluvial plains, which show indications of having, at some distant period, been covered by a large fresh-water lake. Little or no rain usually falls there, except during some of the summer months.

The Museum of Natural History has also been enriched by gifts from Sir Andrew Smith, M.D., K.C.B., of more than 100 Chelonian, Saurian, Ophidian, and Batrachian animals and a few Invertebrata (Scorpions and Spiders), collected by the donor in South Africa and various parts of the world—specimens of a character and in a condition well-suited to improve the means of Zoological instruction in the College; from Dr. W. W. Johnston, articles from Java,—viz. two fine stuffed Leopards; a large case of well-preserved dried Insects, amounting to more than 2000 specimens, the Insects belonging to every Order of that Class: the Collection is richest in large Diurnal Lepidoptera, and also contains a few Scorpions and other Arachnidæ; all the specimens are useful additions to the means possessed by the College, of instruction in Zoology.

The Geological Museum has been increased during the past year chiefly by presents of some interesting specimens from Sir Charles Lyell; Silurian Fossils from the Geological Society; about 400 specimens of Rocks from South Africa, the gift of Sir Andrew Smith; and a series of specimens illustrative of the different states of fusion of the Rowley Basalt, presented by W. Hawkes, Esq., of Birmingham.

Of the Donations to the Library, the most considerable are:—a MS.

Illuminated copy of the Vulgate on large folio leaves of vellum, from Spain, presented by William Steere, Esq., Barrister-at-Law; Cuvier's 'Règne Animal,' twenty volumes half-bound in red morocco, procured by the dividend of the Peene Fund; one hundred and forty volumes, principally Illustrated Architectural works, presented by Samuel Angell, Esq.: among the most notable of these are—Piranesi, de Romanorum Magnificentia et Architectura, vol. i., 55 plates. Rome. 1761–65. Le Pitture Antiche d'Ercolano e Contorni, from the Royal Printing Office of Naples, dedicated to the King Charles III., by "Gli Academici." Scamozzi, Vincenzo, L'Idea dell' Architectura Universale. Cicognara, Leopoldo, Storia della Sculptura. Sgrilli Bernardo Sansone, Descrizione del Duomo di Firenze, 1733. Adam's Ruins of the Palace of Diocletian at Spalatro, 1764. Williams's Oxonia Depicta. Desgodet's Edifices Antiques de Rome, 2 vols., 1771–95. Bibiena, Architectura et Prospectiva, 1740. Clayton's Parochial Churches of Sir Christopher Wren, 1848–49. Sculptured Metopes discovered amongst the Ruins of the Temples of the Ancient City of Selinus in Sicily, by William Harris and Samuel Angell, in the year 1823, described by Samuel Angell and Thomas Evans, Architects, 1 vol. London, 1826.

The following Donations, as well as the valuable collection of Books of Mr. Angell, were received in answer to a Circular of Professor Donaldson, addressed to Architects, Engineers, Builders, Contractors and other gentlemen, requesting contributions of Models, Drawings, or materials for instruction and illustration in the Classes of Architecture, Engineering, and Construction:—An Engraving of the Tower and Spire of Bow Church, London; by John H. Le Keux, from a drawing by John T. Christopher, A.R.I.B.A.: presented by Mr. Christopher. From J. G. McConnell, Esq., a Model of a Solid Wrought Iron Steam-Piston in general use upon the London and North-Western Railway, invented by Mr. McConnell. From Thomas Morris, Esq., a Model of the Square Timber Scaffolding used in the erection of the Nelson Column, Trafalgar Square. From Thomas Wright, Esq., a Model in Iron of his Vice-Jaw-Rail-Joint Chairs, and Mounted Drawings of Wright's Bed Plate-Iron Solid-Sleeper Permanent Ways.

A present was received for the Medical Museum of the College, from Mr. H. B. Tuson, of Eight Glass Cases, each containing from 8 to 12 representations of the more common forms and varieties of Skin Diseases and of Cutaneous Eruptions accompanying certain Fevers; and one Glass Case containing 29 representations of the appearance of the Os Uteri in health and in various stages and forms of Inflammation and Ulceration.

NEW MUSEUM OF ANATOMY AND PHYSIOLOGY.

At the commencement of the Session 1858–59 the attention of the Council was called, at the request of Professor Sharpey, Director of the Museum, to the question of providing additional accommodation for the Anatomical and Physiological Collections of the College. In a statement submitted by the Professor it was represented that the glazed cases containing dry preparations were crowded to such a degree as not only to prevent the specimens from being seen to advantage, but to occasion much risk of injury to those which were required to be moved for exhibition at lectures; that the cases being full, there was no space for additional specimens; that there was no room in the Museum for additional cases; that moreover a large series of specimens of varieties of the Arteries collected by Professor Quain and presented by him to the College—preparations having a peculiar value as having afforded the chief material

for his well-known work on the Arteries,—were heaped together so that they could neither be inspected in their place nor without danger taken out for the purpose of being examined. Professor Sharpey suggested a provisional arrangement by which a portion of the Great Room between the Dome and the North Wing, which had been left unfinished, might be advantageously employed for providing better accommodation for the Anatomical Collections. The Council without hesitation entertained the proposal. On a calculation that the cost of the works necessary for rendering the requisite part of the room available would be about £500, and that a further expense of £200 or £300 might be incurred for additional shelves and cases, they directed that the works should be proceeded with, so that one-half of the room might be ready for the reception of the preparations before the expiration of the long vacation. During the progress of the works the advantage of extending the project of completion to the entire Museum, instead of confining it to a part, became manifest; the original intention was gradually departed from, and by the opening of the Session the whole Museum was completed, with flooring, ceiling, and plastering, and fitted up with cases and shelves.

The expense has been about £1400, the main part of which has been defrayed by £1130 7*s.* 6*d.* produced by a sale since the commencement of the present Session, of £500 East India Stock, a portion of the Legacy of the late Mr. Bacon. The following advantages have resulted from this employment of capital. The entire Anatomical and Physiological Collections are now brought together in one spacious room: they are amply accommodated; and their valuable contents are suitably displayed. The cognate collection of Comparative Anatomy and Natural History, including the private Museum of Professor Grant, has been removed from the ground-floor into the room adjoining the New Museum, viz. the former Museum, which now serves the Professor of Comparative Anatomy for a Lecture Room as well as a Museum. By placing the Wax Models of the Anatomical Museum along with the other contents of that Collection in the New Room, an accommodation much desired has been obtained, and a separate room specially fitted up, for the Class of Practical Physiology, now become a Winter Class. Previously there were no means of providing room for that Class but by assigning to it a portion of the Dissecting Room, partitioned by temporary arrangements every year during the Summer Term into several compartments for the Classes of Practical Physiology, Practical Chemistry, and Practical Surgery, as well as for the use of Students pursuing special Anatomical Studies in preparation for Public Examinations. The room vacated by Professor Grant has been assigned for a Museum and Lecture Room to the Professor of Geology and Mineralogy, for which purposes it is peculiarly suited, by reason both of its adequate space and of its being on the ground-floor and resting on vaulted substructions. The vacating of the room at the Arts' end, for some years past assigned to the Geological Department, has set free an additional Class Room for the general purposes of the Faculty of Arts. In finishing the large room, the Council have confined themselves to making it available for use and to improving the light. They have avoided all attempt at architectural display or at completing the original design. All parts of the Building are now finished and turned to useful account.

FINANCES.

An Analysis of the Table of the Receipt and Expenditure at p. 20 results in showing a balance in favour of the ordinary receipt over the ordinary expenditure proper to the year. Deducting from the amount of fees

received the sums paid to the Professors, and Masters, and Hospital Committee, the remainder, the College portion, is £2877 12*s.* 10*d.* To that sum there is to be added for Bacon Fund Dividends, for Interest of Hospital Loan, for surplus of Holme Fund Dividends, after the payments specially charged by the Council on the income of that fund, and for Transfer of Shares, and Rent of Lockers, £1261 5*s.* 7*d.*, which, added to the £2877 12*s.* 10*d.*, gives, as the receipts of the year applicable to its ordinary purposes, £4138 18*s.* 5*d.* The amount of the Expenditure, after eliminating the payments to Professors, Masters, and Hospital, and items specially provided for by the Dividends of Endowment Funds, amounted to £5166 19*s.* 2*d.* But of the Items included in that sum several are either properly chargeable to Capital, or not belonging to the year, or were incurred for extraordinary repairs: *i. e.* Buildings, £565 0*s.* 4*d.*; portion of Furniture, £160; portion of House Repairs, £260; extra Printer's Bill (an arrear of former years), £97 5*s.* 6*d.*; equal to £1082 5*s.* 10*d.*, which, deducted from the total expenditure of £5166 19*s.* 2*d.*, leaves £4084 13*s.* 4*d.* The expenses for Building, Furniture, and Extra House Repairs, were incurred chiefly on account of the completing and fitting up of the Museum of Anatomy: paid originally out of the General Cash Account, their amount, together with a portion of subsequent expenses for the same purposes, has been, since the close of the Session, replaced by the sale of Stock mentioned at p. 17.

A supplement to the statement of Receipt and Expenditure shows that the sums for endowment received and invested for the purposes of the College and Hospital between the 1st of October, 1858, and the 30th of September, 1859, amounted to £10,541 10*s.* Mr. Filliter's second donation of £1000 has been since received. Of the sum mentioned £2125 appertains to the Hospital.

THE TREASURER.

With great regret the Council have yielded to the desire of Mr. Taylor that he should not again be nominated for election to the office of Treasurer. Mr. Taylor has assiduously and ably discharged the duties of Treasurer, and of Chairman of the Committee of Management, during eighteen years, and has earned by his valuable services the gratitude of the College, which is moreover indebted to him for interesting and most acceptable contributions to the Library and Museum. Among these are the volumes of the Philosophical Transactions for 1825 to this date, with the right to the volumes to be hereafter published during his life; and a copy, two volumes folio, of the Hebrew Concordance of the Bible, the work of his ancestor, John Taylor, D.D., of Norwich, 1754. The Council are glad to have the opportunity of retaining Mr. Taylor as a Member of their body, and have consequently nominated him for election as Councillor. Mr. Grote has kindly consented to be put in nomination for the office of Treasurer.

THE FORMATION OF RIFLE-CORPS.

The Council and Senate have concurred in the opinion that it was not the duty of either body to take any active part in inducing the Students to become Members of a Rifle Corps. They considered the question to be one rather for the decision of the Students themselves, or of their parents and friends, than of the authorities of the College. The Students, however, having formed a Company and applied to the Council for the use of the Cloisters and Play-ground for Drill, that request was very readily complied with. The Council have besides granted the use of the Play-ground for the purposes of Drill to the Rifle Corps of the Working Men's College three times a week, from 7 to 9 in the evening; to a Corps formed of the young men of Messrs. Shoolbred's establish-

ment twice a week, from 6 to 8 in the morning; and the use of the Cloisters twice a week in the evening to the Highgate Rifle Corps. In acceeding to these applications, the Council took precautions against any interference with the arrangements of the Corps belonging to the College, as well as for the due observance of order by persons not subject to College discipline.

The Council have also, on the application of the Head Master, sanctioned the formation in the Junior School of Companies to be taught the Rifle Drill for Cadets.

HOSPITAL.

The Council conclude their Report with an appeal for the Hospital. Its importance as an adjunct to the Medical School of the College cannot be too highly rated, and with a view to increase its efficiency in that respect, arrangements entailing additional expenses have lately been adopted. These are,—the establishment of a special department for Skin Diseases with the necessary baths and other appliances, and the allotment of beds for In-patients to officers who have hitherto had the care of Out-patients only, viz. the Physician, Dr. Hare; Mr. Marshall, Surgeon; and Mr. Thompson, Assistant-Surgeon,—four to each. As already mentioned, a considerable addition has been made to its invested funds through the benevolence of Mr. Filliter; and its Investments and Reversions now amount to upwards of £39,000, after deductions for duty; but the income at present derivable from these sources does not exceed £226. The Hospital, therefore, is actually in great want of funds to carry it successfully through the intervening period until the Reversions fall in.

As it was not thought expedient to have a Public Dinner last year, the ordinary receipts fell considerably short of the expenses, and the debt was increased. In consequence, the Hospital Committee find themselves under the necessity of having recourse this year to an appeal by means of a Public Dinner. Lord Brougham has kindly undertaken to preside, and has appointed Wednesday the 6th of June for the Festival. The Council feel assured that the friends of the College will not be backward in affording support in the Chair to their Noble President, whose character and exertions so greatly contributed to the establishment and success both of the College and Hospital.

Professor Jenner, M.D.	Professor Sharpey, M.D.	A. Woodforde, Esq.

FILLITER EXHIBITION IN PATHOLOGICAL ANATOMY.

An Exhibition of £30, to be awarded annually, founded for the encouragement of Proficiency in Pathological Anatomy by George Filliter, Esq., in Memory of his Son, Dr. William Filliter.

REGULATIONS.

1. That each Candidate shall have been a Student in the Medical Faculty of the College for not less than two years, and shall be a pupil at the Hospital.

2. That each Candidate shall have attended the Class of Pathological Anatomy, and have obtained a certificate of Honour in that Class. That in a previous term he shall have attended the course of Practical Physiology and Histology, and have obtained a Certificate of Honour in the Class of Anatomy and Physiology *.

3. The Examination shall take place in the last week of the month of October, and shall be conducted by the Professor of Pathological Anatomy associated with the Professor of Anatomy and Physiology, and with another Professor of the Faculty of Medicine of the College, to be appointed annually by the Council.

4. The Examination shall consist of—

(*a*) An Examination by means of written papers.

(*b*) The Practical Examination and description by the Candidate of healthy and diseased tissues and products.

(*c*) A *vivâ voce* Examination, when deemed desirable by the Examiners.

5. That the Council of the College shall have power to modify these Regulations from time to time as occasion may require, on condition that whatever the alterations may be, or whatever be the purpose to which the fund is applied, it shall be kept entire, and be called the Filliter Fund, and that the name of Filliter shall be connected for ever with the purpose to which the Dividends may be appropriated.

* In consequence of the late period at which the above Regulations are published, the following Regulation is substituted in place of Regulation 2, in regard to the Exhibition to be awarded in 1860:—

2. That each Candidate shall have attended the Class of Pathological Anatomy, and have obtained a Certificate of Honour in that Class. That each Candidate shall also have obtained a Certificate of Honour in the Class of Anatomy and Physiology; or a Certificate from the Professor of that Class, given after Examination on written questions, that he possesses a competent knowledge of Physiology, such as would have entitled him to a Certificate of Honour at the Class Examination.

WORKING MEN'S MEMORIAL TO SIR ROBERT PEEL.

The Institutions which received contributions from the income of this Fund last year were, the Derby Working Men's Association, the Worcester Working Man's Institute, and the Bristol Free Library. A Collection of Books and Maps, costing £15, was presented to each.

The Dividends of the year 1858–59 were £52 7*s.* 4*d.* The Expenses of the Trust, Advertising, &c. were £4 5*s.* 11*d.* The Balance of the Dividends' account on the 28th January, 1860, was—in cash, £54 13*s.* 4*d.*; in Books in store, £2 18*s.* 3*d.*
